

Per and Poly Fluoroalkyl Substance (PFAS) STATEMENT

Per and Poly Fluoroalkyl substances (PFAS) are man-made Carbon and Fluorine based chemicals that have been used in a wide range of consumer and industrial products due to their resistance to grease, oil, water, and heat. PFAS include PFOA, PFOS, PTFE, FKM, PVDF. PFAS have various applications in electronic products such as protective/water-resistant coatings and do not easily degrade. They are persistent and bio-accumulative in nature, and so are referred to as forever chemicals.

Z-communications only processes semi-finished products of which our suppliers declare they do not intentionally use or add PFAS during production. The absence of PFAS has not been checked by test so this does not exclude the presence of negligibly slight traces due to, amongst others, impurities in the components supplied by external parties and used in the production of such components.

Therefore we, Z-communications, declares that based on our current knowledge, we can inform you that the product(s) below do not contain PFAS.

Part Number	Contains PFAS Y/N	If Y, CAS # (s) of PFAS Chemicals	Name(s) of PFAS Chemicals	Concentration (ppm) of PFAS Chemical
ALL PRODUCTS	N			

This declaration applies to the material as it leaves our facilities. It does not cover any substance(s) or preparation (s) subsequently added and/or in expert material processing or article fabrication further down the supply chain.
